

About Me

I am targeting a junior Cloud-Native Developer or DevOps role where I can combine my full-stack foundation and advanced Level 7 Cloud Engineering training. I specialize in utilizing AI orchestration to build, secure, and deploy scalable SaaS platforms. Backed by a professional background in VFX, I bring rigorous attention to detail, visual polish, and a highly collaborative approach to engineering challenges.

Hard Skills

Cloud & DevOps: AWS, Azure, Google Cloud Platform (GCP), CI/CD Pipelines, Docker, Systems Infrastructure, Linux/Unix, PowerShell.

Client Software: React, Tailwind CSS, Bootstrap5, Sass, MUI, TypeScript, JavaScript, HTML DOM, JSON.

Server & DB: Node.js, Express.js, REST APIs, Python, SQL (PostgreSQL, MySQL), NoSQL (MongoDB).

Certifications: AWS Certified Cloud Practitioner.

Soft Skills

Logical Problem-Solving
Learning Agility
Cross-Functional Collaboration
Attention to Detail
Adaptability & Versatility
Effective Communication

Interests

ELENA KROUPKIN

Cloud-Native Developer

IT Experience

Full Stack Developer (Contract) Nov 2025 - Present
SAGATECH, Remote (California, US)

Architecting and engineering C-OBRA, a specialized multi-tenant construction management SaaS for the US market, utilizing AI Orchestration to accelerate the product lifecycle.

- Security & Architecture:** Engineered PostgreSQL Row-Level Security (RLS) for absolute multi-tenant isolation. Integrated Twilio for password-less SMS/Email Magic Link auth.
- Core Engine Features:** Built a custom Gantt chart engine and an E-SIGN-compliant digital signature system with forensic audit trails and PDF generation.
- Automated Testing:** Collaborated on the design of a concurrent multi-role test suite using Playwright and Hermes agents to run simulated workflows, increasing deployment stability.

Technology used: NEXT.js, React, PostgreSQL, Playwright, Stripe, Twilio, AI Orchestration.

Full Stack Developer, mentored work JUL - SEP 2023
Dacreed, Takapuna

Developed an Admin Panel for a Modular Course Creation Platform, automating 80% of content creation tasks and increasing platform efficiency by 50%.

- Built key frontend interfaces and engineered robust RESTful APIs to facilitate seamless data communication.
- Implemented secure user authentication and optimized database query retrieval times by 20% via Prisma and Supabase CRUD operations.

Technology used: T3 Stack: NEXT.js, React, TS, ESLint, Tailwind, tRPC, GitHub, Vercel, Clerk, Prisma, Supabase

VFX Compositor 2019 - 2022
PRPVFX, Albedo VFX, Cause and FX, Auckland

- Delivered high-end visual effects and technical problem-solving for global TV/film titles (e.g., Power Rangers, GOT) using NukeX, Fusion, and Blender under tight deadlines.

Extra Curricular

- AWS Certified Cloud Practitioner** (Feb 2024)
- Datacom Job Simulation (Forage)** (Feb 2024): Debugged, reviewed, and optimized a web application codebase.

IT Education

Diploma in Cloud Engineering (Level 7) NOV 2025 - Present
Yoobee, Auckland

- Part-time. Maintaining a straight "A" grade average across Cloud Infrastructure, AI Data Engineering, and DevOps modules**

Software Development (Levels 4-6) JAN- DEC 2023
Mission Ready, Auckland

Bachelor of Arts & Design (VFX Compositor) 2015 - 2018
Media Design School, Auckland
